Wine & Beverage Spoilage Testing

**FAST & SPECIFIC
DNA TESTING**

dnature[®] test a variety of bacteria and yeasts including...

- Brettanomyces
- Pediococcus
- Zygosaccharomyces
- Acetobacteria
- Lactobacilli
- Native ferment species
- DNA Sequencing for unknown culture samples

We also DNA test your juice/drink, bottle, can or barrel

DNA Testing with dnature[®] means...

- No more YES/NO results, giving you the knowledge about what exactly is happening in your beverage.
- Detection of viable but non culturable (VBNC) populations of bacteria and yeasts – spoilage that can't be seen on a plate.

dnature[®] tests are developed in New Zealand for the New Zealand beverage industry.
